

# European Priorities in Astroparticle Physics

BRUSSELS 29 - 30 September 2008

ASPERA/ERANET is developing a Roadmap for the future in Europe of the 7 subfields of astroparticle physics. They aim to probe the mysteries of dark matter and energy, reveal the picture of the high-energy Universe, solve the secret origin of cosmic rays.

On 29 and 30 September in Brussels - Metropole Hotel - the Roadmap and Priorities for European Astroparticle Physics large infrastructures will be presented and compared with neighbouring field priorities in Europe (Astrophysics, ESA, ESO, CERN) and the European ESFRI Roadmap for large infrastructures.

These will also be compared with the priorities of other continents and the ways towards a global coordination will be discussed.

Programme and registration: <http://www.aspera-eu.org>

# European Priorities in Astroparticle Physics

BRUSSELS 29 - 30 September 2008

## Welcome to Brussels !

Presentation of the Roadmap  
Discussion of the Priorities for European  
Astroparticle Physics Large Infrastructures

Organised by ASPERA and IIHE(ULB-VUB)

Programme and registration: <http://www.aspera-eu.org>

# European Priorities in Astroparticle Physics

BRUSSELS 29 - 30 September 2008

## Practical information

- Need help? Registration desk open all day
- Coffee: ground floor near registration
- Lunch: in *Jardin Indien* - included in registration
- Dinner:
  - *Les Petits Oignons* at 19:30
  - €30 to be paid at registration - address and map available after payment
  - Bring your badge and menu selection form

# European Priorities in Astroparticle Physics

BRUSSELS 29 - 30 September 2008

- Speakers: please contact the local organisers during breaks to upload your talk
- Free internet access in room opposite conference room
- WIFI : different possibilities of paid access
